

PRODUCT SHOWCASE

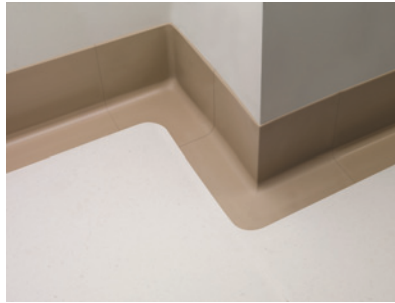

2/90 Enhanced Modular

Don't stop designing at signage. 2/90 Enhanced offers designers a sustainable sign system that can be customized with infinite colors, textures, materials, and design elements to complement any environment. For more than thirty years, 2/90 has successfully worked with designers to direct people to, through, and out of healthcare facilities.

Health Design Wall Base

Health Design Wall Base™ and Preformed Inside and Outside Corners were specifically developed to increase productivity/ease of installation compared to traditional time-consuming and unsightly on-site flash coving. The matte finish ensures an attractive transition while resisting scuffing and gouging with homogeneous color throughout. May contribute to LEED® CI and NC Credits.

**Code Alert® —
Proven. Tested. Certified.**

When reliability, safety, and security matter, choose Code Alert® from RF Technologies. Code Alert® Integrated Care Solutions fully conform to the UL 1069 Standard for hospital signaling and nurse call equipment, and the UL 294 Standard for access control. Plus ZigBee® Alliance and Continua® memberships certify interoperability with your other technologies.

Suspended Sculpture

Talley Fisher creates suspended sculpture for atriums and lobbies. Her imagery is based on natural forms. At Eisenhower Medical Center in La Quinta, California, "Crescendo" presents clouds or flower petals ascending skyward on wings of song. These sculptures evoke positive meaning and hopeful optimism, adding elegance to any space.
