

Enhance your Wayfinding Program with 2/90 Digital Signage

2/90 Sign Systems partners with JANUS Displays[®] to bring you digital messaging solutions. When information needs to change continuously, digital signage is a smart additive to your wayfinding program. Messages can be static, scrolling or interactive. 2/90 offers Wayfinding Directories, Digital Bulletin Boards, Digital Window Displays and more. JANUS Displays[®] state-of-the-art software, VIZIA, is user-friendly with advanced capabilities for managing content and layout.

2/90 Digital is powered by VIZIA, JANUS Displays[®] innovative software for content design and management. VIZIA interfaces with a variety of scheduling programs to create a seamless system that automatically updates your event schedules. Your digital signage will arrive pre-loaded with 20 slides customized to your facility's branding. Save time and money by making changes to your 2/90 Digital signage solutions without leaving your desk.

Whether mounted to a wall or encapsulated in a kiosk, finish options for 2/90 Digital are compatible with other 2/90 signs for aesthetic consistency throughout your facility. Our interactive Wayfinding Touch Screens instantly provide navigation for occupants and visitors, ensuring they find their destination quickly. Digital Bulletin Boards broadcast multiple messages efficiently and effectively. Scrolling text, flash animation and video is instantly updated system-wide to save staff hours of posting and updating hardcopy. Digital Window Displays identify destinations with up-to-the-minute information. When rooms are not in use, post special announcements, live news feeds and weather forecasts.
