

GloSign Photoluminescent Emergency Egress System

In an emergency evacuation, every second counts. Moving people through and out of a building during a dangerous situation requires a safe and orderly exit. Let 2/90 GloSigns guide the way.

2/90 GloSign photoluminescent emergency egress products are designed to help safeguard your building's occupants and visitors. They require no electrical and are ideal for egress markings in your stairwells, hallways, corridors and rooms.

We use state-of-the-art material that absorbs and stores energy from fluorescent, mercury vapor and metal halide light sources. If the electrical power goes out, GloSign uses its stored energy to produce an immediately visible illuminated pathway.

2/90 Sign Systems' comprehensive emergency egress pathmarking system includes signs, tapes and marking materials necessary to meet the new government mandates. In addition, 2/90 offers design, wayfinding, installation and maintenance services to support your product investment.

For more information about GloSign products, pricing, technical specifications and luminance test data, please call 2/90 Sales at 800.777.4310 ext. 4323 or email info@290signs.com.

Durable. 100% reliable.

Maintenance-free. No wiring, electricity, batteries or special cleaning needed.

Easy to install. Signs include mounting hardware for your choice of flush, perpendicular, freestanding and ceiling-suspended applications. Peel-and-stick tape attaches to most walls, floors, baseboards, handrails, stairs and columns.

Environmentally safe. Non-toxic and non-radioactive.

Compliant. UL 924, NFPA 101 Life Safety Code, ASTM E 2072-00 Specification for Photoluminescent Safety Markings, ASTM E 2073-00 Photoluminescent Test Methods, ASTM E 2030-99 Guide for Photoluminescent Safety Markings and New York City Local Law 26.
