

EZ ID

UPDATING SIGNS JUST GOT EASIER.

We have become accustomed to instant information – on demand and always at our fingertips. Now you can enjoy that same convenience with EZ ID™, a wireless, ADA-compliant digital sign system that lets you manage and administer identification signage from any location, simply and easily.

EZ ID™ uses the secure diffused infrared communication technology you've seen in e-paper products to manage and deliver information – no internet connection required. Signs can store multiple levels of secure information and communicate bi-directionally to confirm updates, two features which play an important role as the system grows and allows people to self-schedule rooms and meetings.

EZ ID™ signs come in small and large sizes, and the large size can be mounted vertically or horizontally. These signs are powered by replaceable, long-life (5-year) batteries, so no messy, disruptive hard wiring is necessary to install the system.

You'll love this electronic sign system – it's that easy.

IT'S THIS EASY!

- Simple and easy information management
- Digital and ADA-compliant
- Secure, interference-free infrared technology
- Superb readability with high-contrast 170° viewing angle e-paper display
- Multiple sizes and layouts
- Long-lasting 5-year batteries
- No hard wiring
- Completely brandable to match your organization's identity
- Secure storage for multiple levels of information
- Rapid return on investment
- Built-in confirmation
- Bar code access to information and room inventory
- Comprehensive support
