Maintenance  
And  
Replacement  
Technology**

## HOW SMART!

Just as people need check-ups, it is SMART for wayfinding programs to have them too! SmartCare+ is 2/90 Sign System's answer to maintaining your signage and protecting your investment. Whether your facility has 500 or 5000 signs, 2/90 will customize a plan unique to your needs. Let's face it, with personnel turnovers, changing department names and building renovations, it's hard for your signs to keep up. Our "Sign Doctors" will make sure your signs look and perform well.

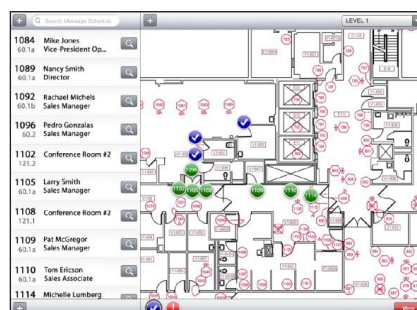

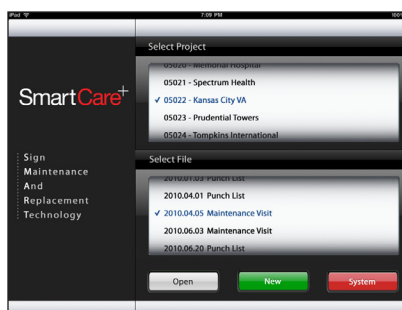

## WE CARE!

2/90 Sign Doctors CARE about your wayfinding program! We will evaluate your interior sign system and wayfinding needs. Our review will cover your entire wayfinding program from online customer flow management systems, to campus-wide exterior signage, to interactive wayfinding signage and software needs. We will recommend an appropriate maintenance schedule based on the frequency of change in your environment. After your scheduled check-up, we will provide a detailed prescription to keep your wayfinding system healthy.

## THE PLUS!

The PLUS is in the details! We will review your existing sign planning relative to traffic-flow, problematic situations, sign-type revisions, building renovations, etc. Next, we will evaluate your facility utilizing our iPad SmartCare+ app to document observations about the state of existing signage; recording damage, misuse and missing parts or signs. Then, we will provide a method of treatment with pricing and installation costs along with necessary updates to your wayfinding manual.

So, don't put it off another day! Call our Customer Care hotline at 800.777.4310 to schedule your check-up!
