

Workstation Signs and Conference Room IDs

Challenge: Medtronic needed workstation signs to accommodate their logo, individual names and cubicle workstation numbers. Maintaining consistency was an issue because employees were removing and customizing their own workstation signs.

Solution: 2/90 assisted Medtronic to adopt a consistent design concept that allows flexibility for signs to be changed easily. The solution was a P-mounted sign which fastens under Medtronic's panel top caps to prevent individual customization. 2/90 recommended a laser-print paper option for easy maintenance of the system. The laser-print templates are managed by Medtronic's Plant Services Department to ensure consistency of the program. The original workstation design was reconfigured with a slider to be utilized as a conference room sign throughout the facility. A total of 2,600 signs were produced.

"Thank you very much for all your help with the signs. We have been implementing them into our facility and have been receiving nothing but compliments. Everyone really likes them. I personally am very pleased because from a Facility Maintenance standpoint; they are the answer to all our problems. It is very easy to modify and change out the names and station numbers. I am also very pleased that they are installed under each top cap and therefore can not be taken by the end user. I highly recommend these signs to any company and look forward to working with you on future projects."
