GRAND RAPIDS, MI – 2/90 Sign Systems, an industry leader of solution-based architectural signage, introduces **InfoBoard** to their line of healthcare specialty products.

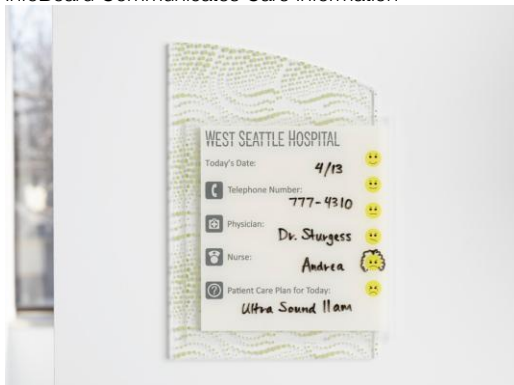

Architectural communication solutions positively impact a patient's perception of their hospital experience. Increase patient satisfaction with InfoBoard to communicate care information to the patient, visitors and staff.

InfoBoard is available in six shapes, twenty patterns and unlimited colors and materials. Choose from several standard sizes and templates or create a custom design to complement your environment or promote your brand.

Patient, visitors and staff will stay informed by recording hand-written messages. The dry erase material can be customized with subsurface printed graphics to ensure durability. Choose a standard template or create your own. Other options include a holder for markers or SmartStrip to display laminated or paper messages.

Conveniently display InfoBoard at the patient's bedside for easy access to information. Capture patient emoticons, nurse's name, family's phone number or patient's cleaning preferences for staff to guarantee everyone is informed.

InfoBoard Communicates Care Information

About 2/90 Sign Systems

For over thirty-five years, 2/90 Sign Systems has been an industry leader providing solution-based architectural signage systems. We offer a turn-key solution for customers by providing interior, digital and exterior signage along with wayfinding, installation and maintenance services. We are the partner-of-choice to many prestigious healthcare, corporate, educational, hospitality and federal government facilities. 2/90 is also available through GSA Schedule (GS-07F-0265N) and UNICOR 2/90. Please visit www.290signs.com for more information.
