

# EX TER IOR

**Main Identification**

**Post and Panel**

**Wall Mount**

**Dimensional Letters**

YOUR INTRODUCTION TO THE OUTSIDE WORLD.

YOU ONLY HAVE ONE CHANCE TO MAKE A POSITIVE FIRST IMPRESSION.

Exterior signs represent your organization to customers, employees, and community members - including those you know, and those you don't. And however you want to introduce yourself, 2/90 can help. We offer free-standing or mounted signage, post and panel signs, illuminated or non-illuminated signs, dimensional letters, and even electronic messaging - all designed to help you make a lasting impression.

Our signs are fabricated with aluminum components and state-of-the-art paint technology to provide excellent durability in all weather conditions, so your investment performs beautifully over time. We're also experts at incorporating electronic messaging boards where you can educate, inform, entertain, or just get noticed. Get started by taking a look at our portfolio, or feel free to get creative and share your own ideas! We love putting our experience to work for you.

# SO MANY APPLICATIONS!

- Inform
- Identify
- Direct
- Illuminate
- Reinforce Your Brand
- Communicate With Electronic Messages

## MAIN IDENTIFICATION

2/90 can help you show off your organization's name and logo to tell the world who you are. We offer a wide assortment of extrusions and enhancements like electronic messaging to create any design you can imagine. Our trained professionals are ready to help with every aspect, from planning, design, and manufacturing to installation.

## POST AND PANEL

Post and panel signs create a navigational system that helps visitors navigate around the exterior of your facility or throughout your campus. Available in four styles with a wide variety of design options, these signs can also be made with changeable copy panels for easy updates and illumination for night-time driving.

## WALL MOUNT

In today's busy landscapes, elevating your sign above street level can be a powerful way to boost awareness of your organization. Installed directly on a building façade, a wall mount sign provides a high-visibility way to identify your building, making it a popular alternative to a ground mount sign.

## DIMENSIONAL LETTERS

Dimensional letters can be installed directly on the façade as an alternative to typical wall mount signs. Generally used for main identification, they can be designed in any size, thickness, and font imaginable. Choose from a variety of types including flat-cut metal, flat-cut acrylic, high-density urethane, LED-illuminated and fabricated letters along with logos.
