

HEALTHCARE

COMMERCIAL CASE STUDY

Client: Fauquier Hospital Date: 2003 - Present

Location: Warrenton, VA Value: \$265,000

Scope: Created custom enhanced elements to compliment the facility's architecture while providing a sustainable sign solution.

Products: Slide Modular Sign System, Exterior Signage, and Installation

Challenge: Fauquier Hospital is a non-profit community hospital which has been providing quality healthcare to the residents of Fauquier and surrounding counties since 1954. It is independently operated and locally governed by a board of directors, with no funding from state or federal agencies. The hospital began renovations and new construction in 2003, at which time 2/90 Sign Systems began working with them to design a comprehensive wayfinding program.

Solution: Fauquier Hospital's signs combine 2/90's Slide Modular Sign System with custom design details. The enhanced elements compliment the facility's architecture while maintaining a consistent and flexible sign solution that is easy to update as the facility's needs change. A corrugated 3Form® material is used on all wayfinding signs as accent panels and a water-jet aluminum logo is applied for additional dimension. 2/90 provided a turnkey signage solution for this hospital serving a rural/suburban community in Virginia.

HELPING PEOPLE FIND THEIR WAY. 2/90 Sign Systems is an industry leading architectural signage manufacturer with more than 40 years of experience helping clients solve facility signage challenges. We are a national partner-of-choice to prestigious corporate, healthcare, education, and institutional facilities, offering dynamic signage solutions for a positive environmental experience.

2/90 proudly offers comprehensive design and planning services, high-quality interior and exterior signage systems, and full-service installation and maintenance services to implement effective wayfinding programs for built environments. Our team of skilled professionals works closely with our clients to provide a seamless signage project experience for lasting impressions.
