SafeCare - Two Color

ENGINEERED FOR SAFETY. DESIGNED TO INSPIRE.

2/90 Sign Systems is a leading signage manufacturer with a proven history of successfully implementing design-build facility signage programs for healthcare clients throughout the U.S.

SIGNS DON'T NEED TO LOOK BORING TO BE SAFE. 2/90's FlxSign and SafeCare signs are designed for patient safety while enhancing the healing environment. In any behavioral health environment where there is concern for patient safety, it is imperative to look for ways to create a safer, friendlier environment using ligature-resistant products. Our sign solutions are low-profile to inhibit a ligature point where a patient could use it with a strangulation tool to perform an act of self-harm.

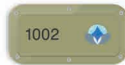

Our behavioral health sign solutions include subsurface paint and graphics, including ADA-compliant tactile characters and Braille, removing the possibility of a choking hazard. In addition, SafeCare is made of polycarbonate, which prevents it from breaking and being used to cause self-harm. Both sign solutions install securely with adhesive tape, reinforced with silicone. SafeCare's installation is fortified with tamper-resistant, countersunk fasteners, and plastic alligator anchors. We are proud to say SafeCare is the only American-made sign product meeting the strict requirements of the New York State Office of Mental Health Safety Standards, while FlxSign receives accolades as an alternative.

SAFECARE™

SAFECARE SIGN FAMILY. 2/90's standard offering includes a complete family of 16 sign types to identify, inform, regulate, and direct. SafeCare signs offer a sustainable attribute for changeable information with supplied perforated paper inserts and online print templates. Custom sizes and shapes are available.

COLOR OPTIONS.

BE INSPIRED. SafeCare sign and copy colors are available in any of 2/90's Prism and Designer colors. Choose a one-color scheme for any sign type or choose a two-color scheme for ADA sign types. Custom colors can be specified for an additional fee.

FLXSIGN™

FLXSIGN ALTERNATIVE OPTION. FlxSign was created as a cost-effective ADA-compliant solution to our system signage. The ligature-resistant profile along with the subsurface paint and graphics easily made FlxSign a popular signage solution in the behavioral health environment. Our family of standard sign types continues to be specified as a stand-alone or complimentary option to SafeCare and our architectural sign systems.

TURNKEY WAYFINDING SOLUTIONS.

HELPING PEOPLE FIND THEIR WAY. In addition to Behavioral Health Signage, 2/90 Sign Systems has a wide range of other products to meet all your signage needs. Hospital visitors and patients have a lot on their minds. Navigating a complex medical facility should not be one of them. 2/90 has over 40 years of experience in helping our clients solve their facility signage challenges. Our design-build approach offers a holistic signage experience for patients, visitors, and staff while providing superior product solutions for the built environment.

Through our collaborative design build process, 2/90 specializes in developing signage programs that complement the architectural aesthetic while solving unique communication challenges with identification, wayfinding, life-safety, medical regulatory, and informational messaging. 2/90's modular signage systems and turnkey services offer a sustainable product solution to reduce facility maintenance costs and improve patient satisfaction through positive facility experiences.

SafeCare installs securely with tamper-resistant, countersunk fasteners, plastic anchors, and adhesive.

PROTECT THE PEOPLE IN YOUR CARE. Contact 2/90 at 800.777.4310 or email info@290signs.com. We will evaluate your current wayfinding program and offer solutions that create a positive experience for patients, visitors, and staff. Schedule an appointment today!
