

# SAFECARE<sup>™</sup>

## PROTECT THE PEOPLE IN YOUR CARE.

**SAFECARE reduces the risk of in-patient self-harm.** SAFECARE features a low-profile design and beveled edges to prevent patients from using it as a ligature point for self-harm. Signs are made of polycarbonate to prevent it from breaking and being used as a weapon. They include tamper-resistant features such as subsurface paint and graphics, as well as secure installation methods. SAFECARE is suitable for various facilities, including healthcare, schools, and institutions, and is the only American-made sign product that meets the strict safety standards of the New York State Office of Mental Health.

SafeCare installs securely with tamper-resistant, countersunk fasteners, plastic anchors, and adhesive.

# SAFE CARE™

## ENGINEERED FOR SAFETY. DESIGNED TO INSPIRE.

2/90's standard offering includes a complete family of sixteen sign types to identify, inform, regulate, and direct. SafeCare signs offer a sustainable attribute for changeable information with supplied perforated paper inserts and online print templates. Custom colors, sizes, and shapes are available.
