

# MAINTENANCE

## SERVICES

**DO YOUR SIGNS NEED HELP?** It's not too late to invest in your wayfinding program with SmartCare+. We will review your signage program for maintenance updates and additions to confirm your signage program remains effective. Our SmartCare+ Maintenance Service includes a comprehensive signage survey, detailed survey report, and a quote for necessary signs and replacement parts matching your original specifications to ensure your signage continues to perform beautifully within your environment.

# // MAINTENANCE

## HOW SMART.

Just as people need check-ups, it is smart for wayfinding programs to have them, too. SmartCare+ is 2/90 Sign System's answer to maintaining your signage and protecting your investment. Whether your facility has 500 or 5000 signs, 2/90 will customize a plan unique to your needs. Let's face it: with personnel turnover, department relocations, and building renovations, it's hard to make sure your signs look and perform well. We can help maintain your signage program.

## WE CARE.

2/90's SmartCare+ Agents care about your wayfinding program. We will evaluate your interior and exterior sign system and wayfinding needs, and will recommend an appropriate maintenance schedule based on the frequency of change in your environment. Your maintenance survey will provide a detailed report and action plan to keep your wayfinding system healthy.

## THE PLUS.

The plus is in the details! We will review your existing sign planning relative to traffic flow, problematic situations, sign-type revisions, building renovations, etc. Next, we conduct an on-site survey of your facility and document observations about the state of existing signage, recording damage, misuse, and missing parts or signs. Then, we provide a report and recommended action plan with pricing and installation costs, along with necessary updates to your wayfinding manual.

## PROTECT YOUR INVESTMENT.
